Dear SMT Program Indonesia Selection Team,

My name is Muhammad Irza Arifin, an active Information Technology student at CEP-CCIT FTUI. I am writing this letter to express my interest in participating in the Cybersecurity Training Program organized by SMT Program Indonesia.

I am very excited about this opportunity as it provides me the chance to delve deeper into cybersecurity and learn how cybersecurity professionals work in the industry and on the ground. I am confident that participating in this program will help me sharpen and continually improve my skills and experience.

At my university, I have chosen Web Development as my specialization. Despite this, I have a strong interest in cybersecurity. When my university organized an internal competition among students with a cybersecurity theme, specifically Capture the Flag (CTF), I was eager to participate. This competition was in collaboration with Spentera, using their Hacktrace Lab. Through Hacktrace Lab, I took courses on Kali Linux and Cybersecurity Fundamentals, which provided me with basic knowledge in the field of cybersecurity.

I know I am not yet an expert in this field, as evidenced by my not winning the Capture the Flag (CTF) competition I mentioned earlier. However, I am not a pessimist and have a strong desire to learn and become more proficient in this field. This is why I am very interested in joining the SMT program.

I am very enthusiastic about participating in this program and confident that it will help me achieve my future career goals.

Thank you for your time and attention. I sincerely hope to be given the opportunity to interview and demonstrate my commitment to this program and become a part of SMT Program Indonesia.

Sincerely,

Muhammad Irza Arifin
